

# Law Enforcement Solutions

## The Problem

For almost 50 years law enforcement agencies around the country have relied on dated technology such as Voice-Activated Radio-Dispatched Alarms (VARDA) and other devices to expand their policing reach. While ground breaking at the time, advancements in technology and evolving radio system have made much of this technology outdated and less effective today. While a need still exists for technology that can improve response times and give law enforcement agencies an expanded reach, these needs must be balanced with often times limited budgets to work with.

## Delivering an Immediate Response

Response Technologies' Centurion Elite® offers the quickest Direct to Responder (D2R®) law enforcement solutions on the market. Our line of wireless sensors can be deployed anywhere in the world using our Centurion® Defender. Deploy the cellular enabled Defender anywhere that trouble may occur and rest assured that the proper authorities will be notified within seconds of an alarm activation.

Delivery methods can include any combination of modern communication methods including, email, text message, phone, CAD integration/computer software, or two-way radio. These delivery method combinations are designated in Elite Audiences®, which allow users to customize specific responses based on the sensor that is activated. With the Centurion Elite®, the user can assign all sensors to alarm in the same way or can customize each individual alarm to activate a different response.

## USE CASES

**DOMESTIC VIOLENCE/ PERSONAL PROTECTION** — Providing duress buttons to potential victims of domestic violence, or high profile witnesses, can be the difference between life or death. The Centurion Elite® allows these users to have the security of a direct to law enforcement duress button while having the freedom to move throughout their homes safely.

**PROPERTY CRIME** — Property crime is a daily issue for most departments around the country, and with limited officer resources to stop it, agencies must get creative in how they attack it. The Centurion Elite® can provide a new age solution to a timeless problem using the flexibility of the Defender. Deploy a defender at the site of a potential issues along with some of our various wireless sensors, and rest assured that if anyone attempts to break-in or steal any property, law enforcement officer will be alerted within seconds of the situation.

## COMMON SENSORS

### WIRELESS PENDANT DURESS BUTTON

- Robust wireless range
- 3-5 year battery life
- False trigger prevention

### INDOOR MOTION DETECTOR

- Wall Mounted
- Up to 50ft range
- 3-5 year battery life

### 360-DEGREE MOTION DETECTOR

- Ceiling Mounted
- Whole room coverage
- 3-5 year battery life

## FEATURES

- Responders are notified within about 2 seconds of alarm activation.
- D2R® communication allows users to bypass third parties and go straight to law enforcement
- The Centurion Elite® can send two-way radio notifications to three different radio frequencies at the same time.
- Built-in false trigger avoidance technology ensures only real alarms make their way to responders.
- Multiple Defenders can be monitored from a single Centurion Elite® system.
- 24/7 sensor monitoring ensures system is always ready for use.
- Defender health status monitoring and alarming
- Easily switch radio systems without costly upgrades to multiple systems.
- Roll-up data packages available for Defender bridges to avoid reoccurring charges.
